

Objectives and tasks of the working group 3 (WG3) on snow data assimilation and validation methods for NWP and hydrological models in the COST action ES1404

Helmert Jürgen
Deutscher Wetterdienst

On behalf of the WG3 members

An overview about the activities in the working group 3 (Snow data assimilation and validation methods for NWP and hydrological models) in the COST action ES1404 will be given.

The main focus is on the assimilation of snow observations in NWP and hydrological models with the aim to increase the number and quality of used observations and to improve data assimilation methods for snow observations.
